SKILLS

Programming Languages: Python, Java, SQL, JavaScript, HTML, CSS, Dart

Frameworks/Libraries: Flutter, Spring Framework, React, Selenium, Robot Framework, Playwright, Bootstrap

Tools/Technologies: AWS(S3, Athena, Quicksight), Docker, Jira, Git, Postman, Oracle Cloud (OCI, VBCS), MS Office

EXPERIENCE

ActualWise Consulting LLC

Chicago, IL, USA

Software Engineering Intern

Oct 2025 - Present

- Engineered **backend data-processing services** in Python to **ingest, validate, and normalize employee and actuarial datasets** for OPEB and pension valuation pipelines, improving data reliability and consistency across downstream computations.
- Abstracted actuarial business rules into reusable components, reduced **manual data handling by ~40%** and streamlined **valuation workflows**.

Syndigo LLC

Chicago, IL, USA

Software Engineering Intern

Jun 2024 - Nov 2024

- Designed a **low-code automation platform using Playwright** to orchestrate UI and API workflows, **reducing duplicate scripting by ~50%** and accelerating cross-team onboarding.
- Built **scalable execution services** supporting **25+ API integrations and 100+ automated workflows** across browsers, **enabling parallel execution** and reliable multi-environment coverage.
- Developed **data transformation and validation pipelines on AWS** to verify distributed product datasets, detecting inconsistencies early and ensuring **100% end-to-end data integrity** before downstream processing.

Cognizant Technology Solutions

Bangalore, KA, India

Software Engineer

Aug 2020 - Jul 2023

- Architected a **Python + Selenium based automation framework** with modular execution, reducing regression **runtime from ~70 to under 3 engineer-days** per release.
- Developed **full-stack execution dashboards** using **Java, React, and Bootstrap**, enabling drill-down analysis of test failures and execution trends, reducing mean time to **identify and triage failures by ~40%**.
- Built a **Java REST service** integrating Jira APIs to generate real-time sprint and defect analytics, **eliminating 95% of manual reporting**.
- Integrated automation and reporting services into **CI/CD pipelines**, enabling continuous quality feedback within **Agile (Scrum)** sprint cycles.
- Partnered with product owners during **UAT cycles** to translate stakeholder feedback into prioritized backlog items, accelerating feature acceptance and release confidence.

PROJECTS

Split-A-Bill

[Frontend](#) | [Backend](#)

- Built an **AI-powered receipt ingestion pipeline** using **Google Cloud Vision OCR**, extracting structured pricing and tax data from unstructured bills, **reducing manual entry by ~90%**.
- Implemented **RESTful microservices** with **Java and Spring Boot** for bill management and user workflows, enabling **scalable CRUD operations for concurrent users**.
- Formulated proportional split and tip-calculation algorithms with modular business logic to enable extensibility and maintainability.
- Hosted backend services on **Google Cloud Platform (Cloud Run)** with monitoring and logging, achieving **~99% service availability** and actionable performance insights.

TacTics

[Repository](#) | [Download APK](#)

- Implemented an **AI opponent using the Minimax adversarial search algorithm**, delivering optimal single-player gameplay across multiple game variants.
- **Developed a cross-platform Flutter application** with responsive UI and efficient state management, supporting smooth gameplay on iOS and Android.

AutoApplyLn

[Repository](#)

- Orchestrated an **end-to-end system** to discover, filter, and process LinkedIn job postings, automating application workflows and reducing manual application effort by ~80%.
- Extracted structured job data with **Selenium-based scraping modules**, enabling tracking of **100+ applications concurrently** and generating actionable reports that **improved user outreach visibility by ~70%**.

EDUCATION

Continuous Learning: Google Cloud Platform (GCP), Agentic AI, Prompt Engineering, Machine Learning

Illinois Institute of Technology

Chicago, IL, USA

Master's in Computer Science, *Specialization in Software Engineering*

May 2025

- **Relevant Coursework:** Software System Architecture, Data Processing & Analysis, Mobile Application Development, Big Data Analytics, Advanced Database Organization, Software Testing & Analysis

Sastra University

Tanjavur, TN, India

Bachelor of Technology

Jun 2020

- **Relevant Coursework:** Web Applications Development using Java, Management Information Systems, Operations Research, Industrial Robotics
